Doug,

Congratulations on being the first to successfully apply for and obtain this permit. And, thanks for helping us trail blaze through this entire process. You, Jim Mace, and Jim Reynolds were instrumental in keeping things on a track that we believe meets the public safety concern without harming the club's operations.

Attached is the Poulsbo Shooting Facility Operational Permit per your application and inspection. The permit is valid until September 30, 2020 unless you make changes to the range that expand the facility beyond the current perimeter lines of each shooting range or make other changes that would warrant an addendum.

You'll note that we've included Chris Dunagan from the Kitsap Sun in this email, as well as Adam Cole from RCO. He is responsible for the FAAR program. Given your desire to replace 25 year old overhead baffling, this should help in your application process. If you need additional support, please let us know.

Again, congratulations and thanks for all the help.

Larry
